

# IMAS WORLDWIDE

Chauffeur Application Suite for iOS, Android, and Admin Web — booking, dispatch, live trip management, payments, and scalable fleet operations.

01

## CUSTOMER APP

Book transfers, track rides, and manage trips with a premium guest experience.

02

## DRIVER APP

Accept assignments, update status, and complete jobs with clear trip details.

03

## ADMIN WEB

Dispatch drivers, manage fleet and rates, and run daily operations.

IMAS WORLDWIDE

PLATFORM

iOS · Android · Admin

TYPE

Scope & Delivery Brief

Engagement overview

IMAS WORLDWIDE needs a production-ready chauffeur platform that clients can book on mobile, drivers can run in the field, and operations can control from a secure admin console.

Vyntech Solutions will design, brand, configure, and launch a full suite: Customer and Driver apps for iOS and Android, an Admin web console, backend APIs, payments readiness, notifications, maps, and go-live support.

| OUTCOME              | WHAT IMAS WORLDWIDE GAINS                                                                 |
|----------------------|-------------------------------------------------------------------------------------------|
| Own branded platform | Clients experience IMAS WORLDWIDE — not a generic white-label marketplace.                |
| Faster booking cycle | Customers book from their phone; ops and drivers work from one live system.               |
| Operational control  | Assign drivers, monitor trips, manage fleet and rates without daily developer dependency. |
| Payment readiness    | Card payments can be enabled in-app (Stripe) when ready — or remain ops-led.              |
| Store distribution   | Apps prepared for App Store and Google Play under the IMAS brand.                         |

Success criteria

|                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                              |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>For leadership</b></p> <ul style="list-style-type: none"><li>Platform looks premium and brand-aligned</li><li>Scope is clear: Customer, Driver, Admin</li><li>Launch path to stores is defined</li><li>System can grow with vehicles and cities</li></ul> | <p><b>For operations</b></p> <ul style="list-style-type: none"><li>Reservations are visible and assignable</li><li>Drivers get clear trip instructions</li><li>Live status stays in sync across apps</li><li>Team can run daily ops after handover</li></ul> |

How the platform works

One connected system: customer request → operations decision → driver execution → trip close-out. IMAS WORLDWIDE stays in control of dispatch quality.

1

**Customer books**  
  
Chooses route, time, and vehicle in the IMAS app.

2

**Ops confirms**  
  
Admin reviews and assigns the right chauffeur.

3

**Driver serves**  
  
Pickup, trip updates, and live status sync.

4

**Trip closes**  
  
Payment settled where enabled; history saved.

Roles and responsibilities

| ROLE        | PRIMARY ACTIONS                                                                         |
|-------------|-----------------------------------------------------------------------------------------|
| Customer    | Sign in, create bookings, track status, pay when enabled, view history, manage profile. |
| Driver      | Go online, receive jobs, run trip flow, update statuses, view completed work.           |
| Admin / Ops | Manage reservations, assign drivers, configure fleet and rates, monitor live rides.     |
| System      | APIs, database, maps, push notifications, payments, and secure authentication.          |

What stays under IMAS control

**Business configuration**

- Fleet categories and inventory
- Pricing and distance rules
- Operating regions / service types
- Driver roster preferences
- Support contacts and hours
- Assignment preferences for ops

**Brand and experience**

- App name, logo, colors, listing
- Customer-facing copy and tone
- Payment mode (on or ops-led)
- Notification policies
- VIP / corporate service standards
- Guest communication preferences

Supported service patterns

| PATTERN               | PLATFORM SUPPORT                                                                     |
|-----------------------|--------------------------------------------------------------------------------------|
| Airport transfer      | Scheduled pickup, optional flight notes, ops notes for meet-and-greet style service. |
| Point-to-point        | Maps search, vehicle class selection, clear fare presentation.                       |
| Hourly / as-directed  | Duration-oriented booking for chauffeur-style engagements.                           |
| Staff-created booking | Admin can create reservations and share pay-later Stripe links when configured.      |

Customer mobile application

The customer app is the public face of IMAS WORLDWIDE — premium, simple, and reliable for airport transfers, corporate travel, and VIP chauffeur service.

Account and onboarding

- Email registration and secure sign-in
- Google / Apple social sign-in on iOS
- Profile: name, phone, city, photo
- Session security and logout
- Account deletion for store compliance

Booking experience

- Book now or schedule for later
- Airport, point-to-point, chauffeur trips
- Maps-assisted pickup and drop-off
- Vehicle selection with pricing
- Special notes for driver / dispatch

Payments and confirmation

- In-app Stripe payments when enabled
- Pay-later / pending if ops settles offline
- Booking confirmation details
- Push notifications for status updates

Trip and history

- Live ride status during active trips
- Past reservations and receipts
- Support contact from profile
- Clear trip timeline for the guest

## Driver mobile application

Built for field use: fast status updates, clear trip details, and minimal friction so chauffeurs can focus on the guest.

### Driver workflow

- Secure driver login
- Availability / online control
- Offers or assigned jobs
- Accept, start, complete trip steps
- Push alerts for new work

### Trip execution

- Pickup, drop-off, passenger, notes
- Status sync with admin and customer
- Location-assisted ops where enabled
- Completed trip record
- Earnings / job visibility

## Admin web console

A secure browser dashboard for day-to-day dispatch and business configuration — the operational heart of IMAS WORLDWIDE.

### Reservations and dispatch

- Reservation inbox with status filters
- Manual or assisted driver assignment
- App vs web assignment channels
- Trip timeline and status visibility
- Customer and booking records
- Internal operational notes

### Fleet, drivers, settings

- Fleet vehicles, categories, rates
- Driver roster and profiles
- Live map / active ride visibility
- Custom reservation + pay-later links
- Daily operational settings
- Admin authentication / protected routes

Platform foundations

Security, reliability, and store readiness

| AREA             | HOW VYNTECH SUPPORTS IMAS                                                          |
|------------------|------------------------------------------------------------------------------------|
| Security         | HTTPS, JWT sessions, role separation, server-side validation, environment secrets. |
| App Store / Play | Icons, splash, bundle IDs, build pipeline, listing metadata and review guidance.   |
| Permissions      | Clear purpose strings for location, camera, and photos where required.             |
| Privacy          | Privacy policy URL structure and data-handling transparency for submissions.       |
| Release quality  | Staging + production checklist, TestFlight / Play internal tracks, QA cycles.      |

What is included in delivery

| DELIVERABLE            | DESCRIPTION                                                                         |
|------------------------|-------------------------------------------------------------------------------------|
| Customer mobile app    | Branded iOS and Android app for booking, payments, tracking, history, and accounts. |
| Driver mobile app      | Branded iOS and Android app for assignments, trip execution, and driver workflow.   |
| Admin web panel        | Secure dashboard for reservations, fleet, drivers, live operations, and settings.   |
| Backend and hosting    | API, database, and production environment configured for IMAS WORLDWIDE.            |
| Brand and store assets | Logo integration, icons, splash screens, and store listing guidance.                |
| Integrations + QA      | Maps, push, payments wiring, TestFlight / Play tracks, and release candidates.      |
| Handover and training  | Admin walkthrough for dispatch, fleet updates, and standard operating flow.         |

Responsibility split

Provided by IMAS WORLDWIDE

- Logo, colors, app name, brand assets
- Fleet list, service types, pricing
- Operating city / region and support
- Apple and Google developer accounts
- Payment / push accounts when live
- Domain / email for messages

Delivered by Vyntech Solutions

- Branded UI and product configuration
- Mobile apps, admin web, backend
- Environment setup and production
- Store pipeline and submission support
- QA cycles and refinements
- Training and post-launch support window

Delivery phases

PHASE 1

Discovery

Brand, fleet, pricing, regions, payment mode, success metrics.

PHASE 2

Build

IMAS branding, backend, apps, admin flows, staging.

PHASE 3

Test

QA, TestFlight / Play testing, dry runs, feedback.

PHASE 4

Launch

Go-live, store support, training, handover.

Enterprise technology stack

| LAYER         | STACK AND VALUE                                                      |
|---------------|----------------------------------------------------------------------|
| Mobile apps   | React Native + Expo (TypeScript) — one codebase for iOS and Android. |
| Admin and API | Next.js + React + TypeScript — secure ops console and API layer.     |
| Database      | PostgreSQL + Prisma — structured, audit-friendly booking records.    |
| Auth          | JWT sessions + Google / Apple social login.                          |
| Maps          | Google Maps / Places — address search and location-aware booking.    |
| Payments      | Stripe — enabled at launch or ops-led per IMAS preference.           |
| Push & cloud  | Device push + hardened hosting, HTTPS, controlled releases.          |
| Release       | EAS Build + App Store Connect / Play Console pipelines.              |

## Why partner with Vyntech Solutions

### Enterprise delivery

- Full stack: apps, admin, backend, launch
- Brand-first product for IMAS WORLDWIDE
- Operations-first dispatch tools
- Clear phases and accountability

### Practical partnership

- Direct stakeholder communication
- Training for daily operations
- Store submission support
- Room to expand over time

## Optional expansions (separate scope)

### Growth options

- Multi-language experience
- Hotel / concierge workflows
- Advanced auto-dispatch
- Loyalty / promo / referral

### Channel options

- Marketing website tied to apps
- Additional city rollouts
- Analytics dashboards
- Custom IMAS integrations

## Next steps to kick off

To start the IMAS WORLDWIDE platform with Vyntech Solutions, we confirm:

- |                                                        |                                                     |
|--------------------------------------------------------|-----------------------------------------------------|
| <b>01</b> Final feature package for phase one          | <b>05</b> Apple and Google developer account access |
| <b>02</b> Brand assets and app store names             | <b>06</b> Payment mode for launch (on or later)     |
| <b>03</b> Fleet categories and pricing rules           | <b>07</b> Preferred launch window                   |
| <b>04</b> Operating city / region and support contacts | <b>08</b> Commercial package and kickoff date       |

### Assumptions and commercial note

Timelines depend on timely brand assets, fleet and pricing inputs, developer account access, and decision-maker feedback. Payment and push go live when IMAS provides provider accounts. Commercial terms, calendar, and third-party fees are provided in a separate quotation upon request.
